

Course Description

InfoVista® Certified Developer (IVCD) 4.0

Duration: 2 days

The InfoVista Certified Developer (IVCD) is the highest certification level offered by InfoVista. The IVCD certification exam aims to recognize your advanced practical and theoretical skills on InfoVista products and functionalities. The exam covers a wide range of theoretical and practical knowledge.

Student Profile

The successful IVCD graduate has extensive knowledge of the VistaFoundation® Centralized Inventory (VF-CI) platform and is able to successfully develop customized VF-CI solutions. The IVCD profile is therefore typically that of engineers and consultants, as well as third party solution developers.

Prerequisites and Related Courses

Candidates who wish to take the IVCD certification exam should have already passed the InfoVista Certified Administrator (IVCA) exam and then have followed the 'VistaFoundation Customization' and 'VistaFoundation Solution Development' courses, or have equivalent knowledge. In addition to this minimum requirement, candidates should have several months of field experience in all aspects of InfoVista VF-CI project implementation: installation, architecture, custom library design, and Portal customization.

Exam Format

The IVCD exam is a two-day exam comprising a number of modules, of which two are theoretical. The two theoretical modules consist of questions and answers. They test candidates' general knowledge of the VistaFoundation Solution Development process. During the practical modules, candidates will install a number of InfoVista products to complete a partially installed VF-CI configuration. They will then develop the necessary files to create a VF-CI solution for reporting on network resources.

Course Registration

To register for this course:

1. Select Services/Training/Schedule & Registration from www.infovista.com
2. Select the region for the desired course
3. Select the desired course and date
4. Click on 'Register for this Course'
5. Complete the Training Registration Form and click 'Submit'.

Shortly after you register you will receive an 'IVCD Prep Kit' to help you prepare for the exam.
