

Course Description

VistaFoundation® CI 4.0 Deployment

Duration: 4 days

VistaFoundation Centralized Inventory (VF-CI) is the adaptive technology platform from InfoVista® for service-centric IT performance reporting. This course teaches new and experienced users how to deploy a VF-CI solution, using partly the VistaInsight® for Networks (VIN) and the VistaInsight® for Servers (VIS) solutions, as a case study. After a successful deployment, the student will be able to hand over a running platform to the operations team who will assure the day to day platform operations. This course is based on the product version 4.0 SP1 of the VistaFoundation components.

Designed as hands-on intensive training, the course leads the student through all phases of installation of the products, performing sanity checks, configuration of the VIS solution and distribution of hot fixes.

Student Profile

This course is designed for all technical audiences, particularly system administrators who will need this course in order to install and deploy a VistaFoundation CI solution. Operations personnel will find this course necessary in order to understand the true capabilities of the system. The course is a recommended pre-requisite for the 'VistaFoundation CI 4.0 Operation and Troubleshooting' course.

Prerequisites and Related Courses

It is recommended that students have a general working knowledge of IT terminology and use of Windows applications.

Course Objectives

After completing this course, students will be able to:

- Understand the purpose and architecture of VistaFoundation CI, using Centralized Inventory
- Install and configure a standard solution and then drive the system in order to display performance data at the web-based Portal
- Operate the various components of the Foundation (login to the Portal, navigate the web pages, discover the network, provision the IV servers, drill down to the source data)
- Apply this knowledge to troubleshooting a real system.

By applying the skills and concepts taught in this course, you will be able to successfully deploy a VistaFoundation CI solution with the aim of handing over an operational platform to the operations team.

Course Registration

To register for this course:

1. Select Services/Training/Schedule & Registration from www.infovista.com
2. Select the region for the desired course
3. Select the desired course and date
4. Click on 'Register for this Course'
5. Complete the Training Registration Form and click 'Submit'.
